THE NATIONAL GRID

TO GIVE A GRID REFERENCE CORRECT TO 100 METRES

EXAMPLE

EAST		NORTH	
Take west edge of kilometre square in which point lies and read the larger figure printed opposite this line on north or south margin.		Take south edge of kilometre square in which point lies and read the larger figure printed opposite this line on east or west margin.	
Estimate nearly Eastwards		Estimate nearly Northwards	
34	2	34	2
Full 100 Metre Reference TQ 342246		Full 100 Metre Reference TQ 342246	

The above Full Reference is unique. For many purposes the first grid letter can be omitted, giving a reference, Q 342246 which refers to intervals of 100 Kilometres. If both grid letters are omitted, the resulting reference 342246 refers to intervals of 100 Kilometres. When the area concerned is sufficiently restricted, as will usually be the case with maps on scales of one inch to the mile and larger, both the grid letters are normally omitted.

At the Eastern edge of this sheet True North is 1° 30' West of Grid North and at the Western edge 1° 27' West of Grid North.

Magnetic North was about 1° West of Grid North in 1963 decreasing by about 1" in six years.

1 square inch on this map represents 17.728 metres on the ground.
